

What is EPAT®?

Extracorporeal Pulse Activation Treatment (EPAT®) is the most advanced and highly effective non-invasive treatment method approved by the FDA. This proprietary technology is based on a unique set of pressure waves that stimulate the metabolism, enhance blood circulation and accelerate the healing process. Damaged tissue gradually regenerates and eventually heals.

This non-invasive office/clinic based procedure represents a breakthrough treatment option for a broad range of musculoskeletal conditions.

What disorders can be treated?

Generally, acute or chronic muscle pain and/or tendon insertional pain that significantly impairs mobility or quality of life including:

- Neck
- Shoulder
- Back and chest
- Upper extremity
- Lower extremity
- Foot and ankle
- Myofascial trigger points

What are the possible side effects/complications?

The non-invasive EPAT® treatment has virtually no risks or side effects. In some cases patients may experience some minor discomfort which may continue for a few days. It is normal to have some residual pain after intense exercise or a full-day of work.

Elective Payment and Insurance

Insurance does not cover the EPAT® procedure however, the Elective Payment option allows you to have all the benefits of an EPAT® procedure at a very affordable price. Often there can be a significant savings to you through the Elective Payment option as compared to paying deductibles, multiple co-pays, and other non-insurance covered expenses as you attempt several months of conservative treatments, surgery, post-operative surgical care and rehabilitation. This non-invasive option will be particularly appealing to those patients who are eager return to work or normal activities in only a few days with just as good if not better clinical results compared to traditional treatment methods including surgery.

How much does it cost?

For most patients, the Elective Payment out-of-pocket costs are much less than you would expect. Your physician can provide a personalized pricing program. Some patients can use their employer's "Flexible Payment Medical Savings Account" to cover these out-of-pocket expenses with pre-tax dollars.

How can I get more information?

Your doctor is the best person to talk with if you have questions or concerns about the EPAT® procedure. He or she has extensive knowledge and specialized training on all aspects of its use, safety and effectiveness.

You can also learn more about EPAT® technology and product line by visiting the CuraMedix website at www.curamedix.com.
